FOURTH INTERNATIONAL CONFERENCE ON PHYSICOCHEMICAL HYDRODYNAMICS*

Editor

ROBERT PFEFFER

Organizing Committee

A. ACRIVOS, J. ALBERY, A. J. BABCHIN (*Scientific Secretary*), D. H. CHENG, J. S. LANGER, B. G. LEVICH (*Honorary Chairman*), H. LUSTIG, O. MOLERUS, L. G. NAPOLITANO, S. OSTRACH, R. PFEFFER (*Chairman*), L. M. PISMEN, D. SCHUHMANN, D. B. SPALDING, AND M. G. VELARDE

Patrons

J. ANDENAES, LORD AVEBURY, J. AXELROD, SIR DEREK BARTON, K. BLOCH, A. H. BOWKER, P. COPPENS, SIR ALAN COTTRELL, J. COULOMB, SIR JOHN ECCLES, M. EIGEN, E. R. GILMONT, R. L. GLUCKSTERN, U. GRIGULL, EARL OF HALSBURY, G. S. HAMMOND, A. HARMAN, A. J. HARRISON, SIR WILLIAM HAWTHORNE, G. HERZBERG, R. W. HOLLEY, F. JACOB, A. KASTLER, L. KERWIN, C. P. MAGRATH, SIR GEORGE PORTER, I. PRIGOGINE, D. V. RAGONE, BARONESS SEEAR, A. SOMIT, D. B. SPALDING, H. L. TOOR, G. WALD, J. D. WATSON, AND J. WIESNER

CONTENTS

Preface. *By* ROBERT PFEFFER xiii

◆

The Breakup of Small Drops and Bubbles in Shear Flows. *By* ANDREAS ACRIVOS 1

Vortices, Stability, and Turbulence. *By* P. G. SAFFMAN 12

On the Possible Relationship among Instability, Transition, and the Large Coherent Structures in a Fully Developed Turbulent Shear Flow. *By* I. WYGNANSKI 25

Pattern Selection in Solidification. *By* J. S. LANGER 33

◆

Two-Parameter Study of the Routes to Chaos. *By* S. FAUVE AND A. LIBCHABER 34

Frequency Spectra in the Chaotic Regime of the Unipolar Injection Electrohydrodynamic Instability. *By* B. MALRAISON AND P. ATTEN 38

Encroachment: An Extension of the Entrainment Concept to Handle a Class of Shear Flows with Disturbed Turbulence Structure. *By* VENKATESA I. VASANTA RAM, VERENA SCHULZ, AND SIEGFRIED KISKE 42

*This volume is the result of a conference entitled Fourth International Conference on Physicochemical Hydrodynamics, held June 13–17, 1982 by The New York Academy of Sciences and The City University of New York.

Critical Effects in Bénard's Problem Due to Temperature-Dependent Surface Tensions. *By* G. LEBON AND A. CLOOT 43

Interaction of the Buoyancy and Surface Tension Mechanisms in a Rotating Liquid Layer Subjected to a Transverse Magnetic Field. *By* G. S. R. SARMA 45

Chaos in a Soluble Model of a Physical System. *By* I. GOLDHIRSCH 48

◆

The Vascular Interface between Tissue and Blood. *By* SHELDON WEINBAUM 50

Solute Concentration Effects on Membrane Transport Coefficients. *By* JOHN L. ANDERSON 52

A Model of Epithelial Water Transport. *By* LARRY S. LIEBOVITCH AND SHELDON WEINBAUM 54

Determinants of Water Flow across the Capillary Wall and Tissue Interstitium. *By* FITZ-ROY E. CURRY AND ROGER H. ADAMSON 57

Microstructural and Peripheral Layer Viscosity Effects on the Flow of Blood through an Artery with Mild Stenosis. *By* P. N. TANDON AND J. K. MISRA 59

◆

On a Dusty Gas Shock Tube. *By* I. I. GLASS AND H. MIURA 63

Hydrodynamic and Heat Transfer Interactions in Particle Assemblages at Intermediate Reynolds Numbers. *By* REUVEN TAL (THAU), D. N. LEE, AND WILLIAM A. SIRIGNANO 65

A New Optical Method for Studying the Mobility of Macromolecules near a Rigid Wall. *By* C. ALLAIN, D. AUSSERÉ, H. HERVET, AND F. RONDELEZ 67

Strong Shock Wave Propagation in Two-Phase Flow. *By* GUI-SHENG LIAN, AN-LU REN, AND ZHENG QIAO FAN 69

The Thickness of the Interface Layer of Growing Ice Crystals. *By* P. BÖNI AND J. H. BILGRAM 72

◆

The Soliton Structures in Three-Dimensional Turbulent Flows. *By* E. LEVICH ... 73

Turbulent Closure Models for Rotating Flows. *By* CHARLES G. SPEZIALE 82

Closure and Isotropic Turbulence. *By* GEORGE TREVIÑO 83

Anomalous Mixing Times in Turbulent Binary Mixtures at High Prandtl Number. *By* DAVID R. NELSON AND RICARDO RUIZ 85

An Experimental Study of Turbulent Pair Diffusivity: Pure Liquids and Polymer Solutions. *By* M. CLOITRE, M. FERMIGIER, P. JENFFER, L. LIMAT, C. ALLAIN, E. GUYON, AND A. AMBARI 87

◆

Stability of Thin Viscoelastic Films with Applications to Biological Membrane Deformation. *By* R. K. JAIN AND C. MALDARELLI 89

Aggregation of Red Blood Cells: Energy Balance at the Interface. *By* SHU CHIEN 103

Flow Patterns for Models of Biological Membranes. *By* PETER NWOYE O. MBAEYI 105

Bending and Squeezing Stability of Membranes: The Role of Asymmetry. *By* D. GALLEZ, M. PREVOST, A. STEINCHEN, AND A. SANFELD 108

Transient Oxygen Transport in Hemoglobin Solutions under Conditions of the Microcirculation. *By* P. T. BAXLEY AND J. D. HELLUMS..... 110

◆

Solid-Loaded Flows: Applications in Technology. *By* O. MOLERUS 111

Nonlinear Instabilities in Fluidized Beds. *By* J. T. C. LIU..... 126

Analysis of Annular Two-Phase, Two-Component Flow in Venturi Scrubbers. *By* A. W. GNYP, C. C. ST. PIERRE, AND S. VISWANATHAN..... 127

Three-Phase Flow of Flashing Non-Newtonian Coal Slurry–Gas Mixtures through a Conduit. *By* A. A. KHAN AND L. J. OTT..... 130

A Computer-Aided Design Package for Spouted Beds. *By* DÜNDAR KÜRSAD AND BIROL KILKIS 133

◆

Multiscale Expansions in Nonlinear Stability Theory. *By* L. M. PISMEN 135

New Results in Bénard-Marangoni Convection. *By* P. CERISIER AND J. PANTALONI 150

Marangoni Instability of Thick Films. *By* TORBEN SMITH SØRENSON..... 152

Dynamics of Defects in Convective Structures. *By* E. GUAZZELLI, E. GUYON, E. DUBOIS-VIOLETTE, AND J. PROST 155

Derivation of an Amplitude Equation for the Soret-Driven Instability in a Binary Fluid Mixture. *By* HELMUT BRAND 157

◆

Kinetorheology: Viscoelastic Response Characteristics of Materials Undergoing Chemical Change. *By* A. SILBERBERG AND M. HENNENBERG .. 159

Hydrodynamic Flow and Turbulence at the Electrodialysis Membrane-Solution Interface. *By* YIFEI FANG, QINGLIN LI, AND MICHAEL E. GREEN..... 170

Non-Newtonian Streaming Birefringence of Polymers and Colloids. *By* E. SCHMITZ AND W. MERZKIRCH 174

The Rheological Properties of Aqueous Alcohol Solutions in Thin Layers between Two Solid Surfaces. *By* P. BELOUSCHEK AND S. MAIER..... 175

On the Flow of Water in the Xylem Vessels of Living Plants. *By* AYODEJI A. JEJE 177

Dynamics and Hydrodynamics of Solutions of Polymers and Suspended Spheres. *By* M. MUTHUKUMAR 182

◆

Combustion: A True Interaction of Fluid Dynamics, Chemical Kinetics, Heat Transfer, and Mass Transfer. *By* STUART W. CHURCHILL 184

Solute Transfer across Liquid-Liquid Interfaces. *By* RICHARD H. GUY 194

Non-Stokesian Damping and Thermally Activated Escape. *By* PETER HANGGI.. 198

Interfacial Motion Due to Coupling between Solute Transfer and Chemical Reaction. *By* E. NAKACHE, M. DUPEYRAT, AND M. VIGNES-ADLER 200

Transport Processes in Porous Charged Membranes. *By* M. N. DE PINHO AND A. M. BRITES 202

Tranfer of Dissolved Gases into Water Flowing through Polymer Membrane. *By* S. K. ACHWAL 203

Study of the Structural Defects in Convective Systems. *By* R. OCCELLI, E. GUAZZELLI, AND J. PANTALONI 205

◆

On the Structure and Stability of Laminar Flames. *By* G. I. SIVASHINSKY 210

Flames as Gasdynamic Discontinuities and Applications to the Stability of Plane Flames. *By* M. MATALON AND B. J. MATKOWSKY 216

An Asymptotic Theory of Condensed Two-Phase Flame Propagation. *By* STEPHEN B. MARGOLIS 218

Onset of Instability in a Chemically Reacting Fluid Layer. *By* ARNE J. PEARLSTEIN AND ROBERT E. KELLY 220

Stability Limits of Planar Premixed Flames. *By* PAUL CLAVIN, PIERRE PELCE, PEDRO GARCIA, AND COLETTE NICOLI 221

◆

Thermodynamically Stable Dispersions: Micellization, Solubilization, and Microemulsions. *By* E. RUCKENSTEIN 224

Motion of Colloids Due to Nonelectrolyte Gradients. *By* MARK E. LOWELL, JOHN L. ANDERSON, AND DENNIS C. PRIEVE 247

Dynamics of a Nonionic Microemulsion. *By* A. B. GLENDINNING AND W. B. RUSSEL 249

The Inhibition of Osmosis by Concentration Boundary Layers. *By* T. J. PEDLEY 251

Migration of a Rigid Sphere of Arbitrary Size and Charge Caused by a Gradient in Salt Concentration. *By* DENNIS C. PRIEVE AND RONALD ROMAN 253

◆

Transport Phenomena in Materials Processing. *By* SIMON OSTRACH 256

A Phase-Change Wave at a Convectively Coupled Solid-Liquid Interface. *By* M. E. GLICKSMAN 269

Simulation of the Melt Flow in Czochralski Growth and in Magnetic Czochralski Growth. *By* W. E. LANGLOIS 274

Convective Transport in Vapor Crystal Growth Ampuls. *By* FRANZ ROSENBERGER AND GERHARD H. SCHIROKY 276

The Capture of Small Particles on Fibers in the Presence of Electric Fields. *By* M.-J. OAK AND D. A. SAVILLE 277

◆

Recent Advances in Microgravity Fluid Dynamics. *By* L. G. NAPOLITANO 278

The Effect of Solutal Convection on the Morphological Stability of a Binary Alloy. *By* D. T. J. HURLE, E. JAKEMAN, AND A. A. WHEELER 299

Thermal Convection and Equilibrium Liquid-Phase Epitaxial Growth. *By* J. A. LEWIS 301

Convection Effects During the Crystal Growth of Sodium Chlorate from Aqueous Solutions. *By* B. SIMON AND J. PANTALONI 302

Effects of Interfacial Transport on the Dynamics of Fluid Fluctuations. *By* DINA GUTKOWICZ-KRUSIN 304

◆

The Spreading of a Liquid on a Solid Surface. *By* R. G. COX 306

Strong Interaction between Particles and Boundaries at Low Reynolds Numbers. *By* S. WEINBAUM, Z. DAGAN, P. GANATOS, AND R. PFEFFER 308

The Deformation and Drag of a Microcapsule Due to Inertia and Viscoelasticity. *By* PETER O. BRUNN, JAMES GILBERT, AND DANNY JIJI 310

The Low Reynolds Number Motion of Spherical Particles toward a Fluid Interface. *By* L. G. LEAL 311

◆

A New Theory of the Deposition of Colloidal Particles from Turbulent Fluids. *By* J. T. DAVIES 313

Instability and Breakup of a Liquid Jet Treated as an Initial-Value Problem. *By* S. A. BERGER 327

The Effect of Liquid and Vapor Mixing on Mass Transfer Efficiency of Multiphase Systems. *By* GERARDO D. RIQUELME AND PATRICIO M. NUÑEZ 330

An Experimental Study of a Two-Dimensional, Low Reynolds Number Turbulent Wall Jet. *By* P. H. OOSTHUIZEN AND W. MONTASSER 331

Mechanics of a Three-Dimensional Interface. *By* MANFRED J. HAMPE 333

◆

Asymmetries of the Melting Transition. *By* J. H. BILGRAM 335

Three-Dimensional Diagnostics of Transport Phenomena. *By* R. GOULARD, P. J. EMMERMAN, R. J. SANTORO, AND H. G. SEMERJIAN 347

The Chemical Indicator: A Tool for the Investigation of Concentration Fields in Liquids. *By* JULIUS W. HIBY 348

Studies of Thin Films in Binary Fluid Mixtures Using Ellipsometry. *By* J. W. SCHMIDT AND M. R. MOLDOVER 350

Concentration Fluctuation Measurements in Reacting Flows *By* S. MAHALINGAM AND R. CHEVRAY 351

◆

Dynamics of Aerosol Formation by Chemical Reaction. *By* S. K. FRIEDLANDER 354

Brownian Motion in Sheared Suspensions. *By* T. G. M. VAN DE VEN 365

Hindered Settling of Uncharged and Charged Submicrometer Spheres. *By* EMMANUEL TACKIE, BRUCE D. BOWEN, AND NORMAN EPSTEIN 366

Aerosol Capture from Low-Speed Flows through Granular Beds. *By* LARRY MANN AND SIMON L. GOREN 368

Spatial Characteristics of Turbulence in the Aorta. *By* T. YAMAGUCHI AND K. H. PARKER 370

◆

Structure of Turbulence Close to a Solid Boundary. *By* C. NIKOLAIDES, K. K. LAU, J. H. A. HOGENES, AND THOMAS J. HANRATTY 374

Mass and Heat Transfer in a Turbulent Non-Newtonian Boundary Layer. *By* YOSHINORI KAWASE AND JAROMIR J. ULBRECHT 391

Turbulence Spot–Like Features of a Boundary Layer. *By* PROMODE R. BANDYOPADHYAY 393

Mean Velocity and Temperature Fields in a Fully Developed, Self-Preserving Crossed Turbulent Shear Layer. *By* X B REED, JR., D. W. HEINECK, AND J. J. JOST 396

◆

Problems in Interfacial Instability. *By* S. G. BANKOFF 405

Surface Tension–Driven Flow: A Mathematical Simulation of Polymer Sintering or Vesicular Coalescence. *By* YAEL HIRAM AND AVINOAM NIR ... 420

An Appraisal of Dry Patch Models. *By* E. G. HAUPTMANN AND S. G. DE RODRIGUEZ 424

Flow-Induced Nonlinear Effects in Thin Liquid Film Stability. *By* A. J. BABCHIN, A. FRENKEL, B. G. LEVICH, AND G. I. SIVASHINSKY 426

Applications of Interfacial Mechanics in Liquid-Liquid Mixing. *By* RICHARD L. LONG, JR. 428

Stability of Shear Flow of Stratified Fluids in the Presence of Surface Tension. *By* R. C. SHARMA AND T. J. T. SPANOS 430

◆

Thermodynamic Constraints in Reactor Design. *By* REUEL SHINNAR 432

Accessible Composition Domains for Chemically Reacting Systems. *By* F. J. KRAMBECK 453

The Stability of Gas Bubbles in Liquid-Gas Solutions. *By* C. A. WARD, P. TIKUISIS, AND R. D. VENTER 455

Study of Water Vapor Thermolysis in a Cylindrical Reactor. *By* G. ABDUL AZIZ, A. BERLEMONT, D. PUECHBERTY, AND M. LEDOUX 457

On the Behavior of Suspensions in Strong Nonuniform Electric Fields (Dielectrophoretic Effect). *By* I. J. LIN AND L. BENGUIGUI 461

◆

On the Correlations between the Structure of Interfaces and Transport Mechanisms for Polyphased Systems with Amphiphilic Species. *By* D. SCHUHMANN 463

The Correlation between Momentum and Mass Transfer for a Turbulent or Periodic Flow in a Circular Pipe by Electrochemical Methods. *By* C. DESLOUIS, B. TRIBOLLET, AND L. VIET 471

Applications of Hydrodynamic Modulation at Rotating Disk Electrodes to Semiconducter Electrochemistry. *By* B. MILLER AND S. BRUCKENSTEIN 473

Solutions of Nernst-Planck-Poisson Equations in the Context of Concentration Polarization at the Cation Exchange Membranes. *By* I. RUBINSTEIN 475

Digital Simulation of the Diffusion Current for a Partially Blocked Rotating Disk Electrode. *By* EUGÈNE LEVART 477

◆

Three-Dimensional Turbulent Boundary Layer with Mass Transfer. *By* TERRENCE S. FOX 480

An Investigation Concerning the Coalescence of Droplets Due to Turbulence. *By* F. EBERT AND H. BÜTTNER 500

Sol-Gel Transition: Experiment and Models. *By* C. ALLAIN, J. C. CHARMET, B. GAUTHIER-MANUEL, E. GUYON, AND B. JOUHIER 502

Turbulent Pipe Flow of Dilute Aqueous Solutions of Clean Laboratory-Synthesized Polyacrylamide. *By* B. GAMPERT AND P. WAGNER 504

◆

Stokes Flow past a Two-Fluid Droplet. *By* S. S. SADHAL AND R. E. JOHNSON 506

Motion of a Two-Dimensional Bubble with Surface Film in a Viscous Liquid between Parallel Plates. *By* JULIUS SIEKMANN AND WALTER JOHANN 510

Bubble Motion beneath Slightly Inclined Downward-Facing Flat Surfaces. *By* S. C. TRAUGOTT, H. J. OBREMSKI, AND C. J. REMENYIK 513

Interaction between Turbulence and a Swarm of Bubbles in Simple Configurations. *By* M. LANCE AND J. BATAILLE 515

◆

Inversion of the Marangoni Convection with Increasing Temperature: Aqueous Fatty Alcohol Solution–Air Interface. *By* M. A. AZOUNI AND G. PÉTRÉ 518

Thermocapillary Convection in a Rectangular Cavity. *By* G. GRAZIANI, R. PIVA, AND M. STRANI 520

Experiments on Thermocapillary Convection with Application to Crystal Growth from the Melt. *By* D. SCHWABE, A. SCHARMANN, AND R. LAMPRECHT 523

◆

Concluding Remarks. *By* B. G. LEVICH 527
